

The course, as skills Claude can use

44 of them, one for every course. Ask a question and get the answer, or hand one a real brand and get the worksheet back filled in. **No coding, no setup, nothing to install on your computer.** About a minute to add each one.

OR JUST DO THIS

1. **Unzip what you downloaded** and open the Skills folder. 44 files, one per skill.
2. **In Claude go to Settings > Customize > Skills > Add > Upload skill.**
3. **Drag in one file.** A security check runs for a minute or two.
4. **Repeat** for the next one. That is it.

One file at a time. You cannot upload the folder or all of them at once — Claude's uploader takes exactly one skill per file.

If a skill uploads but never seems to do anything, check **Settings > Capabilities** has **Code execution and file creation** switched on. That is the only setting these need.

ADD FOUR, NOT FORTY-FOUR

START WITH

aca-welcome

FOR

Start here. What the programme covers, and which skill to open next

aca-103-creative-fundamentals

The building blocks every ad is made of

aca-402-key-metrics

Reading ad numbers without overclaiming

aca-build-angles

Angles for a real offer

Nothing depends on anything else and there is no order, so there is no wrong choice. Come back for more whenever.

THEN JUST TALK TO CLAUDE

“which part of ACA covers hooks”

“break this ad down into its building blocks”

“give me angles for this offer”

If a skill asks you questions, that is it working. It will not invent a price, a customer count or an ad it cannot see.

Built from Ad Creative Academy's own courses and worksheets, credited to the faculty who taught them — Mirella Crespi, Seth Godin, George Mack, Reza Khadjavi, Ashley Vinson, Carlotta Costanzo, Zach Murray, Chloe Rhys, Luke Kostka, Evan Lee, Udi Avital, Jesse Ketonen and Rory Flynn. Quotations are word for word from the recordings.
